DESIGN BASIS

The Waste Treatment Plant has been designed based on the following parameters.

▪ Waste generated from	College
▪ Type of waste	Food waste
▪ Quantity of waste generated	5 kg

TECHNICAL DETAILS:

1	Process	Anaerobic Digester
2	Reactor	Vertical Reactor Portable made
3	Reactor Type	Double Partitioned
4	Design	Water Sealed Jacketed Column
5	Extraction System	Flooding Type Automatic With Respect To Fresh Feed
6	Capacity	1.5 Cum
7	Treatment Capacity per Day	5 kg
8	Gas Production	0.7 kg Of Equivalent LPG GAS
9	Structure	Digester above ground or partially below ground
10	Holder Movements	Horizontal Type
12	Feed	Food waste

The plant can treat 5 kg Food waste per day with a capacity of 1.5 m³. The main part of the biogas plant is digester, which has got two chambers. One is solid waste chamber and the other is liquid waste chamber. The waste directly goes to the solid waste chamber inside the digester. In the first chamber food waste remains for 70 to 80 days, then it converted in to semi liquid form. After that it moves to the second chamber where it remains for 20 to 25 days. Then it purely converted in to slightly viscous blackish liquid which automatically pumps out from the slurry pipe.

ADVANTAGES OF KVIC Model

ROBUSTNESS AND OPERATIONAL RELIABILTY

• Stable under large load variations
• Tolerant to disturbances
• Recovery very quickly after major upsets
• No Clogging of reactors
• No risk of Sludge Bulking
• Excellent Strength to retain high pressure of Gas
• Expert Fabrication
• Customized Design & Fabrication
• Long Life
• Cost Effective
• Easy Maintenance

SOLID WASTE MANAGEMENT

Indira College of pharmacy, Nanded has taken initiatives to segregate the waste at source which is the first and most important step in waste management. The college encourages the process of eco-friendly waste disposal method. Maximum waste generated is recycled and reused. Each Block and Each floor is provided with dry waste collecting bins every day and collected, the same is transported to the concerned places and segregate and hand over to concern. Sufficient quantity of bins provided at wet waste prone areas like cafeteria, food courts etc. There are dustbins placed at specific points in the college Premises.

LIQUID WASTE MANAGEMENT

Liquid waste from the canteen & the wash rooms is collected into pools, recycled using four beds filtration method will further be used for watering the gardens. The laboratory waste water does not contain hazardous chemicals and periodical monitoring is done by the maintenance team. At RO plant also waste water collected. This water is then used for the gardening and other purpose. Institution also conducts discussions with students to make them aware about the liquid waste management techniques.

E-WASTE MANAGEMENT

The condemned batteries and damaged computers are disposed through outside agencies. Obsolete computers and other electronic gadgets are sold to recyclers. E-Waste Management: Electronic goods are put to optimum use; the minor repairs are set right by the Laboratory assistants and teaching staff; and the major repairs are handled by the Technical Assistant and are reused. Pacific Incorporation has a State-Of-The-Art Warehouse meant for storage, dismantling and recycling of electronic waste with the support of latest technology. The equipment which cannot be refurbished for re-use is dismantled and remanufactured into raw materials (i.e. metals, plastics, glass) to be marketed as recyclable. The company assures that the E-waste does not end up in a landfill.

Water Conservation Facilities Available in the Institution

Water is a very scarce and crucial natural resource. In recent years, the state and the region is facing a critical shortage of water not only due to uneven and erratic rainfall but also due to improper management of rainwater. Drought is a common feature. Rainwater harvesting and its reutilization for providing protective irrigation proved effective in assured crop production. Groundwater is clearly the preferred source for farmers. This is one of the reasons why the region has experienced explosive growth in groundwater demand during recent decades and this is also one of the reasons why groundwater demand will further expand with changing climate. However, groundwater lifeline is in precarious situation and is likely to remain for many coming years.

CONSTRUCTION OF TANKS AND BUNDS

The terrace water storage tank is generally constructed using brick masonry, which is placed on an elevated platform to provide a reserve supply of water for daily activities. The construction of a water storage tank with the use of brick masonry is a low-cost option for storing water. The size of the tank is governed by the requirement of the capacity of water storage. If the requirement is more, and more than one tank is to be provided at one place, a larger tank of 20,000 litre net capacity has been built with suitable construction material to achieve adequate water supply.

RAIN WATER HARVESTING

Rainwater harvesting is collecting the run-off from a structure or other impervious surface in order to store it for later use. Traditionally, this involves harvesting the rain from a roof. The rain will collect in gutters that channel the water into downspouts and then into some sort of storage vessel. Rainwater collection systems can be as simple as collecting rain in a rain barrel or as elaborate as harvesting rainwater into large cisterns to supply your entire household demand. It ranges from rainwater collection to rainwater harvesting to rainwater catchment.

Additional Information on

Rain water harvesting structures and utilization in the campus

Recharging of ground water and rain water collection and utilization are implemented in ICOP. Rain water harvesting methods that are implemented in the college campus and has many benefits, such as it prevents soil erosion and increase ground water levels. ICOP is deeply concerned and unconditionally believes that there is an urgent need to address regarding the rain water harvesting methods.

WASTE WATER RECYCLING:

It is a process used to remove contaminants from wastewater or sewage and convert it into an effluent that can be returned to the water cycle with minimum impact on the environment, or directly reused. The latter is called water reclamation because treated wastewater can be used for other purposes. Sanitation also includes the management of human waste and solid waste as well as storm water (drainage) management. By-products from wastewater treatment plants, such as screenings, grit and sewage sludge may also be treated in a wastewater treatment plant.

GREEN CAMPUS INITIATIVES:

Policy Documents/ Decisions Circulated for Implementation The institution has systematically planned every procedure for maintaining its Campus green. Special committee is assigned for developing the infrastructure of organization. Well-coordinated efforts are taken for the institutional development as a part of social responsibility, maintaining eco-friendly environment is our prime duty.

1. Eco-friendly environment is maintained by planting trees and avoiding the use of plastic in day-to-day life.
2. Ample of trees, plants and attractive vines in the institution decorate the corridors, passages and porch and provide the rich source of oxygen.
3. A dedicated full-time gardener is appointed to take care of the plants, trees and vines in the campus. The use of organic fertilizers for growing the trees is promoted.
4. The awareness's programs like tree plantation campaigns, cleanliness campaigns are held to encourage to lead eco-friendly life and make the environment clean.
5. The institution encourage the student opt for public transport in order to control pollution.
6. The institution organized some strategies to set and achieve paperless goals. The institution insists to minimize the use of papers for office purposes as by reducing excessive use of printing, remove extra printers and request paperless statements. The institution supports for organizing digital documents, using e-mails, using social networking sites like whatsapp for everyday notices and communication.

Policy Documents/ Decisions Circulated for Implementation of Ban on Plastic:

The institution has systematically planned every procedure for maintaining its Campus plastic-free' and shall strive to make their campuses by systematically banning use of plastics and replacing the same with suitable environment friendly substitutes.

- a. Ban use of single-use plastics in canteen, institution's premises and hostels, etc.
- b. Carry out awareness drives and sensitization workshops on the harmful impacts of single use plastics.
- c. Mandate all students to avoid bringing non-bio-degradable plastic items to the institution.
- d. Encourage their students to sensitize their respective households about harmful effects of plastics and make their households plastic free'
- e. Install necessary alternative facilities like water units to avoid the use of plastic water bottles, and encourage use of alternative solutions like cloth bags, paper bags etc. ,instead of plastic bottles, bags, covers and other goods on campus.
